

Latest Innovations in Plastics Processing

You are invited to attend a FREE technical seminar!

This FREE one-day seminar offers plastics processors detailed information on key topics of prime importance to the plastics industry. Of interest to general managers, production engineers, purchasing managers and all others involved in the selection and operation of manufacturing equipment and additive materials for their plastics operations. Participants will have an opportunity to listen to experts in each of the fields and ask questions about the latest innovations in plastics processing.

August 29, 2019
Sofitel Saigon Plaza
Ho Chi Minh City, Vietnam

Sponsored Presentations

“Vistamaxx Performance Polymers for Rethink Recycle”

ExxonMobil Chemical

From the world's premier petrochemical company, Vistamaxx™ performance polymer offers new possibilities for the compounding industry. Engineered to accept high filler loading with better dispersion, Vistamaxx™ is compatible with polypropylene, polyethylene and other polymers, simplifies the manufacturing process and provides excellent organoleptic performance for food contact applications.

“Optimization of your Plastic Processing System / Possibilities to Reduce Costs Significantly”

Maag

Regardless of temperature, pressure or viscosity, look to Maag for quality gear pumps, screen changer and filtration solutions. Maag has achieved industry leadership by satisfying one customer at a time by providing reliably efficient, high-quality equipment, driven by a customer-centric product development philosophy, and backed up by worldwide network of attentive service and support organizations.

“Quality Control via Collin Test Equipment”

Collin Lab & Pilot Solutions

Collin is a worldwide premium provider of intelligent, modular pilot and laboratory lines for plastic processing industry, universities as well as for Research institutes. With its product lines Teach Line, Lab Line, Pilot Line, Medical Line and Polytest Line, Collin develops individual solutions – platen presses, roll mills, calenders, extruders, compounders, mono or coextrusion lines, pressure filter tests, rheometers or optical inspection systems. Collin solutions are used for the development and production of plastic products, material tests, test series up to pilot tests, which allow an upscale to production scale.

“Innovations and solutions in the pelletizing process”

Maag Automatik

World leader in pelletizing technology, Maag Automatik offers six decades of experience and with an installed base of more than 8,000 pelletizing systems.

As the only global provider to offer all production technologies for all pellet shapes, only Maag Automatik can provide the balanced and unbiased technical and business support plastics processors throughout the world require for maximum operational profitability.

“Advanced and Innovative Material Handling Solutions for Compounding Applications”

Coperion K-Tron / Coperion Materials Handling

A world leader in providing process automation equipment, systems and solutions for bulk material handling. Coperion K-Tron makes the feeders and pneumatic conveying components, supervisory controls and digital scales that go into its material handling systems. Presentation covers the main elements of a gravimetric feeder, their major role in achieving and maintaining compounding precision and other technological innovations for plastics processing.

“Compounding of Filled Polymers with the Co-rotating Twin Screw Extruders ZSK and STS”

Coperion

Coperion is the global market and technology leader in compounding & extrusion, materials handling and support integration. In close partnership with our customers, we apply our comprehensive systems and process expertise to implement fully integrated solutions for compounding technology and bulk materials handling, encompassing the full added value chain from initial consultation to commissioning and ongoing support services.

Learn about exciting advances in these process technologies for today's demanding plastics processing applications:

- Continuous Feeding & Proportioning Systems
- Pneumatic Conveying Systems and Applications
- Compounders/Extruders & Mixers
- Gear Pumps, Screen Changers & Filtration Units
- Raw Materials, Mineral Fillers & Plastic Additives
- Pelletizing Systems

Seminar Program

Registration (9:00)

Welcome & Introduction (9:30)

ExxonMobil (9:45)

"Vistamaxx Performance Polymers for Rethink Recycle"

Speaker: Andrew Ng, Senior Market Developer

Coffee Break (10:30)

Collin Lab & Pilot Solutions (10:45)

"Quality Control via Collin Test Equipment"

Speaker: Hans Fischer, Sales Director Asia

Coperion K-Tron / Coperion Materials Handling (11:30)

"Advanced and Innovative Material Handling Solutions for Compounding Applications"

Speaker: S C Yong, Regional Sales Manager

Tuan Le, Regional Sales Manager

Lunch (12:15)

Coperion (13:15)

"Compounding of Filled Polymers with the Co-rotating Twin Screw Extruders ZSK and STS"

Speaker: Alex Utracki, Business Development Manager

Coffee Break (14:00)

Maag Pump Systems (14:15)

"Optimization of your Plastic Processing System / Possibilities to Reduce Costs Significantly"

Speaker: Jones Chiew, Sales Manager

Maag Automatik (15:00)

"Innovations and Solutions in the Pelletizing Process"

Speaker: Klaus Arlandt, Sales Manager Asia

Questions and Answers (15:45)

Adjourn (16:15)
